SES #	TOPICS
Probability distributions and random variables	
I. Probability	
1	Sets and events (PDF)
2	Probabilities and counting rules (PDF)
3	Conditional probability and independence (PDF)
II. Random variables and distribution functions	
4	Bayes theorem and random variables (PDF)
5	Discrete and continuous random variables (PDF)
6	Probability distribution functions (PDFs), cumulative distribution functions (CDFs), joint distribution of 2 or more random variables (PDF)
7	Joint and marginal distributions (PDF)
8	Review (PDF)
Expectations and transformations of random variables	
III. Transformations of random variables	
9	Functions of random variables (PDF)
10	Functions of several random variables (PDF 1) (PDF 2)
